Parents as Teachers is the trusted resource for the most respected organizations and professionals serving children and families within the early childhood development and education continuum. We equip early childhood organizations and professionals with information and tools that are relevant—and widely applicable—to today's parents, families and children, especially those in vulnerable circumstances.

Alignment with Early Head Start

The Parents as Teachers Family Engagement Alignment resource handbook illustrates the connection between the Foundational Curriculum/Parents as Teachers Approach and Office of Head Start requirements, including alignment with the five Head Start essential domains, as well as alignment with the Office of Head Start's Parent, Family, and Community Engagement (PFCE) Framework.

The resource handbook can also be beneficial to states seeking to understand PAT's alignment with early learning standards or to any program interested in assessing child progress and family engagement for planning services and for showing improvement in outcomes as required by funders.
